

Executive Summary

Monetize your inbox.

A new kind of email/messaging system where users receive money for each messaging received.

Earn money in each email/messaging you receive. Your time is money, monetize your time and your emails.

No more spam: marketing advertisers pay you to receive emails. Examples:

To Monetize: **Receive only emails that pay you.** You set the price per email sent to you! by sender, followers, domain, email list, or unknown senders.

To block all unknown spam = Set a large price for each email from that sender. The spam sender should pay you the price you set, if they want to email you! like exboyfriend, etc.

Flexible: By Using the stamp price you monetize your inbox, and/or block all the spam.

Project overview

Problem solving:

No monetizing your inbox, and lot of spam that consumes your time reading email.

Solution:

Stamp, an email/messaging system, where you monetize your inbox. Receive money from each mail you receive. No more unwanted spam.

Potential Impact:

In 2021, there were an estimated 319.6 billion e-mails sent and received daily around the world. This figure is projected to increase to **376.4 billion daily e-mails by 2025.**

By 2025, the number of global e-mail users is expected to reach a total of **4.6 billion users**

E-mail marketing:

Despite the increasing popularity of messengers, chat apps and social media, **e-mail has managed to remain central to digital communication and continues to grow in uptake. By 2025, the number of global e-mail users is expected to reach a total of 4.6 billion**- an approximate six hundred thousand increase in users, up from 4 billion in 2020.

Click-through rates:

Not only that, when it comes to online advertising **e-mail has seen higher click-through-rates than on social media**. In Belgium and Germany, these were 5.5 and 4.3 percent respectively - compared to the 1.3 percent global average CTR for social media during the same time period.

Value proposition

Receive money with each email you receive.

Monetize your inbox.

No more unwanted spam, receive money from every email you receive.

Set different ranges of value of stamps for your emails received.
